

ETHICAL CHARTER OF NATURE ENSEMBLE

Nature Ensemble is a structure free of any religious, political commitment.

The Earth, the life gets out of breath: the degradation of nature accelerates, poverty and exclusion increase, Man is more and more disconnected from the nature ...

The action of all becomes urgent and necessary.

Nature Ensemble joins in this movement, wishing to contribute to bring a track, a new direction; namely to bind the environmental protection, the social, the solidarity and the development of the imagination and the creativity within the framework of the development, of the sustainable and united evolution.

This in order to contribute to break subdivision, to refuse exclusion, to create a group dynamics and to see to it to find the link with the nature.

This approach also aims at finding new tracks of propositions of nature conservation, more united lifestyles and at allowing most persons that possible to become full actors.

The sum of ideas will contribute to the wealth and will allow finding new tracks and solutions together.

Approach of development, sustainable and united evolution

❖ *Environment*

The nature, without which we would not exist and of which we are a part, gets out of breath.

Global warming, decrease of the biodiversity, pollution, increase of the waste, the exhaustion of the energies, the wasting, the over consumption, the report is there: it is urgent to act.

It is urgent to find, the link with the nature, because our lives, our fates are bound.

To destroy nature is also to destroy us.

To find the link with her - in particular by consuming less, by returning towards the main part, towards the true human relations - would uncork partially in the awareness that we are a part integral of the nature and on the envy to want to protect her, to respect her and of this fact to respect us ourselves.

It became necessary to reinvent a still non-existent system, a system based on new values based on the nature conservation, on the struggle against poverty, on more solidarity and more even on sharing.

But we have to admit that in spite of the urgency, a shape of slowness exists. Slowness provoked by the fear.

Slowness which makes us prefer to stay in the field of the known, even if it means hanging on to branches that we know condemned persons, rather than to manage us towards the stranger, towards the tracks at the moment even not investigated.

Because the stranger frightens; do we doubt of the future?

Why do we thus wait always for the last moment to act? Why do we not believe what we know?

It is urgent to wake up from this state of slowness; more the time will pass and more the waking up will be rough ...

❖ Social and solidarity

Solidarity with the alive, with nature, with the others, with ourselves.

To make meet publics of different horizons around the subject of the nature, making of this last one the vector of gathering and integration, is a tremendous opportunity to take the road of the link between the human being and the nature, of the link between the human beings and that of the human being with himself.

Nature Ensemble also contributes to fight against the exclusion and addresses public miscellaneous, also by including the persons in trouble, the disabled persons, the old persons, the sick persons; to privilege the humanism and break the subdivisions which facilitate the estrangement and more even the individualism, the distrust and the fear of the others, in particular the different persons or which we feel as such.

Perceive the nature as source of strength, energy and resources, as a road towards the truth and the authentic are experiences which Nature Ensemble also wishes to make share.

Open together tracks of reflections to learn to live otherwise, with less of superfluous and with more values and human relations.

As Gandhi said it so well:

“Live simply so that all can simply live”

Or still this Tibetan proverb, in another approach:

“The less you have, the more you are rich, because less you have to lose”

❖ Imagination and creativity

Nature Ensemble develops and binds this axis to the environment, to the social, to the solidarity to allow thanks to the development of this imagination that we have at the bottom of us, to find together new tracks and allow all to become actors of the change. This while facilitating the dream, the playful - by avoiding the moralizing side - “to see to it that it becomes possible”, the perseverance to never drop.

There is always a light, so tiny it is, which leads towards a new track, if we get down to it together.

Values Nature Ensemble wishes to share:

Passion
Responsibility
Ethics
Respect
Quality
Rigor
Courage and tenacity
Listening
Confidence
Appreciation of the persons in trouble and the excluded persons
Refusal of the exclusion
To believe in its dreams and to develop them

Move, not be afraid of the unknown and dare to create something new.
To advance together.

Today for tomorrow.
